

TOP & TILT KITS

MAKES YOUR BOX SCRAPER MUCH MORE VERSATILE BY CONTROLLING TILT & PITCH

VALVE & BRACKET ASSEMBLY

The valve and valve bracket assemblies are a simple and easy to install bolt-on kit, no drilling required. The strong, adjustable bracket also allows positioning to the customers requirements.

FEATURES:

- ❑ Cylinders have special built-in oil flow restrictors which insures smooth operation
- ❑ Cylinders are specially designed to fit your tractor
- ❑ High quality hydraulic cylinders ensure years of trouble free use
- ❑ Cylinders are available in 2", 2 ½" and 3" bore, depending on the tractor size
- ❑ Cylinders are available for top link, single tilt, dual tilt or any combination

FEATURES:

- ❑ Valves are available in 2 & 3 spool
- ❑ Valves handle flows from 15 to 17 G.P.M. (10-13 G.P.M. through the ports) @ 3000 PSI
- ❑ Brackets available for most popular tractor models
- ❑ Bracket assemblies consist of rollbar clamp, adjustable arm with valve mounting and safety valve cover
- ❑ Quick coupler brackets are available so that cylinders can be easily disconnected when not in use

TOP & TILT CYLINDERS

To make box scrapers more versatile, nothing works better than being able to control the tilt and pitch of the implement. Grading jobs are more accurate because you have complete control to develop the slopes you require when landscaping, building roads, etc.

CAUTION: If you extend the top link cylinder to the maximum on some box scrapers and completely collapse or extend the side link cylinder, a box scraper shank **could damage the tractor tire.**
