

## 7. HYDRAULIC BLOCK TYPE OUTLET

The hydraulic block type outlet is located on the control valve assembly.

This hydraulic block type outlet is provided to take power out from the tractor to operate the hydraulic cylinders on the implement, such as front end loader, front blade and so on.

- (1) Block Cover
- (2) Hydraulic Control Valve Assembly
- (3) Block Outlet Cover (Option)
- (4) Inlet
- (5) Outlet

**A : When implement is not attached**

**B : When implement is attached**

**C : To implement (Outlet)**

Max. flow 14 L/min.

(3.7 U.S.gals./min.,

3.1 Imp.gals./min.)

**D : Return Port**

**E : From implement (Inlet)**
